Profile

Detail-oriented professional with experience in data processing, production support, web scraping, and data integration. Possesses hands-on knowledge of modern web development technologies, including React, TypeScript, JavaScript, Tailwind CSS, and database management through personal projects and continuous learning. Demonstrates strong problem-solving, analytical, and technical skills with the ability to quickly learn new tools and technologies.

Experience

SOFTWARE DEVELOPER | TALLECO.COM INC | JULY 2022 – APRIL 2026

- Analyze ticket requirements and communicate with the requester to clarify specifications, collaborating with Tech Leads to address technical challenges in the requirements.
- Change the status of the ticket currently being worked on to "Dev In Progress."
- Set up a New Source in Integration Admin, including configuring the Source, Files, and notifying recipients.
- Create ETL Source Mapping, transforming raw job data into a standardized format in line with user requirements, specifications, and established coding standards, policies, and procedures.
- Upload ETL Source Mapping to MongoDB.
- Establish BRE Rules in OC Admin based on ticket requirements and specifications.
- Develop Importer & Auto Router based on the ticket's requirements.
- Execute queries to check job information in the database.
- Manually run the script for testing and execute queries to verify job information in the database.
- Check jobs in OC Admin and conduct thorough unit testing before submitting the ticket to QA.
- Deploy the Spider after the ticket is QA and UAT approved.
- Ensure the ticket is released to production properly.
- Resolve the ticket once changes in production are verified.
- Monitor tickets due within the next 3 days and ensure development is completed on or before the due date.
- Proactively coordinate with Project Managers in case of issues meeting developer due dates, staging dates, and production deploy dates.
- Review assigned tickets to ensure proper due dates are set.

- Coordinate with Project Managers to address any issues.
- Report to the Project Manager any tickets at risk of missing developer, staging upload, and production deploy due dates.
- Create technical specifications documentation (if the task is already endorsed by the customer) for functional modifications and feature request projects, with a degree of difficulty ranging from easy to moderate.

TRANSACTION PROCESSOR | CONDUENT | MARCH 2014 – APRIL 2022

- Receive, process, classify, and transmit documents accurately according to client requirements and established procedures.
- Process documents received through electronic and hard-copy formats, ensuring completeness and accuracy.
- Sort, scan, image, organize, and archive documents based on document and form types.
- Identify and classify documents according to their purpose, contract requirements, and client specifications.
- Capture and enter relevant information into databases and processing systems with a high level of accuracy.
- Review and verify data extracted through automated data extraction tools to ensure data quality and accuracy.
- Process outbound client correspondence and other required documentation as assigned.
- Ensure completed and verified transactions are accurately transmitted to the appropriate department or next level of processing.
- Maintain compliance with company policies, client requirements, quality standards, and established procedures.
- Perform additional duties and responsibilities as assigned while meeting productivity, accuracy, and quality expectations.

PRODUCTION ASSOCIATE | INNODATA KNOWLEDGE SERVICES INC. | JULY 2011 – SEPTEMBER 2013

- Assisted with digital content management and formatting to ensure accurate and consistent outputs.
- Used basic HTML to perform content updates and formatting adjustments.
- Utilized Microsoft Excel and Microsoft Word for data processing, reports, documentation, and record management.
- Collaborated with team members to complete assigned tasks and meet project deadlines.
- Reviewed and validated work to ensure accuracy, consistency, and adherence to established quality standards.
- Followed established processes and procedures while maintaining productivity and attention to detail.

Education
